

Graduating Seniors: Comp. Science

The Career Center, in conjunction with the Division of Student Affairs and Institutional Research, has administered a survey to graduating seniors for over a decade, asking students about their post-college plans and their overall FSU experience. Of all the Computer Science graduates from Summer 2013, Fall 2013, and Spring 2014, 73 graduates participated (85%). The data presented in this report are based on responses to the Graduating Senior Survey at the point of graduation with data on employment and continuing education outcomes updated for graduates who responded to the six-month follow-up survey.

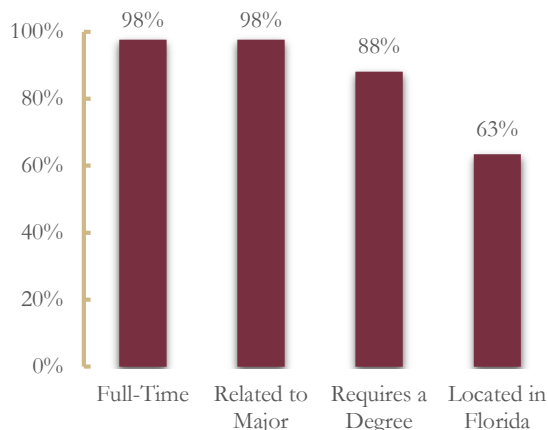

Comp. Science Post-Graduation Plans

Data indicate that over four-fifths of Computer Science graduates are seeking employment after graduation, and nearly one-fifth are pursuing further education.

Comp. Science Post-Graduation Employment

Three-fourths of graduates whose primary plan was employment received at least one offer of employment and are employed in a wide variety of industries. Also, Computer Science graduates most frequently found jobs that were full-time, were related to their major, required a degree, and were located in Florida.
