

Graduating Seniors: Nursing

The Career Center, in conjunction with the Division of Student Affairs and Institutional Research, has administered a survey to graduating seniors for over a decade, asking students about their post-college plans and their overall FSU experience. Of all the College of Nursing graduates from Summer 2013, Fall 2013, and Spring 2014, 82 graduates participated (96%). The data presented in this report are based on responses to the Graduating Senior Survey at the point of graduation with data on employment and continuing education outcomes updated for graduates who responded to the six-month follow-up survey.

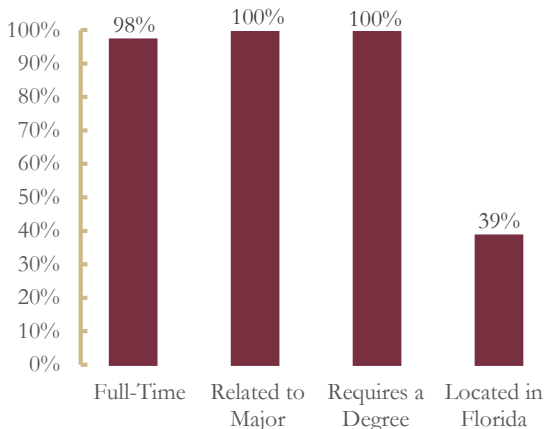

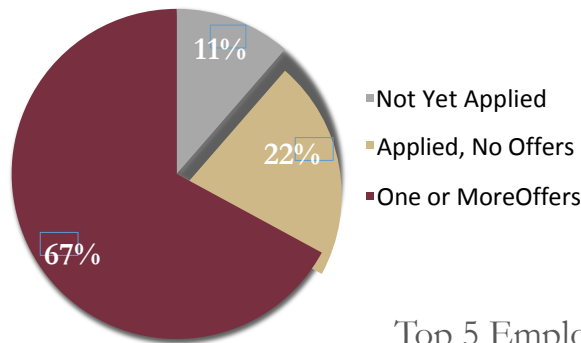

Nursing Post-Graduation Plans

Data indicate that less than five percent of Nursing graduates are pursuing further education after graduation, and nearly all are seeking employment.

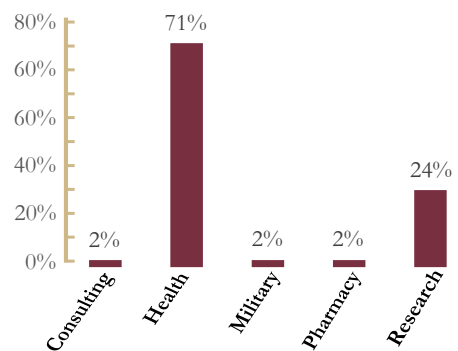

Nursing Post-Graduation Employment

More than two-thirds of graduates whose primary plan was employment received at least one offer of employment and are employed in a wide variety of industries. Also, Nursing graduates almost always found jobs that were full-time, were related to their major, and required a degree.

Top 5 Employment Industries

Nursing Post-Graduation Education

The 4% of the 82 participating College of Nursing graduates who suggested that their primary plan was to continue their education in Spring 2014 did not provide sufficient data for the production of the Post-Graduation Education analyses.

Nursing Student Characteristics

Nursing graduates have success both inside and outside of the classroom, and participate in various extracurricular activities.

Professional Experience

99% of graduates completed an internship

Giving Back

96% of graduates participated in community service

Campus Involvement

100% of graduates participated in one or more campus activities

Research Experience

20% of graduates participated in a research project

Global Experience

9% of graduates participated in study abroad

Academic Excellence

30% of graduates participated in the honors program
